EDUCATIONAL EXHIBIT

For Teachers' Convention—Information on Asbestos Project

To the Teachers of Lamoille County: The teachers of this county are now busy preparing an educational exhibit on asbestos for the State Teachers' Convention, to be held in St. Johnsbury next fall. An effort is being made to make it the leading feature exhibit, giving publicity to a little known but growing industry in this state. Many people in this county but little about this local industry and the information below will be worth reading by both teachers and laymen alike.

LOCATION OF MINES

The Thetford mines in Canada reach from Black Lake to East Broughton, over a belt 30 miles long. This mine produces 80 percent of the world's asbestos or a total last year of 176,000 tons, 85 percent being shipped to the United States and valued at \$12,000,000. In South Africa the Orange Mountains and the Rhodesia mines produce several grades of spinning fiber consumed in England. Russia in 1913 produced over 13,000 tons but during the present time production is almost at a stand-still due to the unsettled conditions. Small mines are located in China, Australia and Peru. These are of minor importance, however.

1500 tons per year of asbestos fiber especially used in electrical high tension work is produced in Arizona.

Other forms of asbestos used in porcelain, pottery clays, cements and paint fillers have been produced for many years in Georgia, South Carolina and Maryland. The Lamoille County deposit is the largest in the United States. Approximately 15,000,000 tons of asbestos rock has been exposed which will average 8 percent or 160 pounds of asbestos to each ton.

RAILROADS AVAILABLE TO THE THETFORD MINES AND THE LAMOILLE COUNTY MINES

The Boston & Maine and the Quebec Railroad serves the Thetford mine district of Canada, first centers being Montreal and Quebec. The St. Johnsbury & Lake Champlain Railroad passes thru Hyde Park, connects at St. Johnsbury with the Boston & Maine and at Burlington with the Rutland and Central Vermont.

METHODS OF OPERATION

At the Eden mine the method of mining is similar to quarry work, the rock being drilled by compressed air machines, then blasted, passing thru crushers until it is reduced to one-inch size; then the fiber which is loose is picked up by a suction quite similar to a vacuum carpet sweeper.

The rock is then crushed finer and more fiber picked out as released, this method continuing until all the fiber is reduced. Fiber is graded into lengths and sold for various purposes—long fiber brings \$600 per ton, down to short fiber at \$15 per ton.

ABOUT EDEN MINES

It is estimated that the production of the Lamoille County mine the first year will be at the rate of 10,000 tons, this production being increased to 30,000 within a few years. Twelve and one-half tons of rock should produce one ton of asbestos at the Eden mine, or 8 percent, costing for milling and mining, \$1.60 per ton. Figure out the cost for operation for the year at the mine. The cost for the Thetford mine is \$1.65 per ton. The Eden mine is in an advantageous position regarding markets, considering those markets as Boston, New York and Detroit.

PART OF THE USES

AUTOMOBILES

Clutch facings, brake linings, packing rings, tires.

BUILDINGS

Mill board—used similar to beaver board, plaster, fire proof rooms, shingles.

DOMESTIC

Table covers, stove mats, table mats, flat-iron holders, gas logs, fiber for grates, book cases and files are lined with asbestos, curtains, screens, rope for fire escapes, lining in gas furnaces.

ELECTRICAL

Flat-irons, electrical equipment of all kinds using asbestos for insulation and protection, motors, insulated wires, moving picture booths, curtains, etc.

VARIOUS

Furnace-men's leggings, aprons, gloves, large mantles in laundries, coverings for locomotives and all grades of steam engines, steam pipes, hot surfaces, refrigerating systems, used as a body in paints and in conjunction with cement and chemical works.

There are some one thousand and more uses, some of which have been listed above. In case samples of asbestos rock in its various forms of the mine, or sample of the products are needed, please communicate with Major H. W. Edmundson, Mining Engineer and Asbestos Specialist, Hyde Park, Vt. If more information is desired on any special phase of this project, please write Superintendent R. D. McAllister, Hyde Park, immediately as the time is short between now and the end of the year.

REMEMBER THE CORN VARIETY TESTS

Care in the selection of your seed corn will well repay you another winter. Buy the right variety and be sure of the germination. The good corn season of last year has enabled many a man to pay his taxes, but such a season comes seldom and late varieties that gave an enormous crop last year may mean a loss this year.

Davis Flint, R. I. Flint and Sheffield are varieties that are sure to give good tonnage and high value per acre. Other kinds may, but are not so certain.

This winter has shown how a corn crop helps out when the hay mow is short. If you have seen it, you must admit that it is worth while to put a little more time into getting the corn ground in better condition than usual, using a little more fertilizer, trying to get a more even planting, keeping down the weeds and fighting to get your crop to the No. 1 silage stage before your short period of summer runs out.

FELCHERVILLE

Mrs. Bixby of the Barnes district has got up a \$23 Larkin order to get a clock for the school.

Mrs. Noyes took her father and mother for a ride Sunday. They have stood the hard winter well and Uncle Vern is out getting his garden ready for planting. They, I think, are our oldest couple in town. From their home on Fitch Hill they have seen a great many changes in their day.

Joe Banister was through Monday. He comes to the door with goods as cheap as though you sent to Sears & Roebuck. Long may he be able to come.

The Zanol Company has a man coming through every two weeks from Johnson.

Miss Helen Crowell was a visitor at Trudeau's the first of the week.

A few of the callers at the old plastered house were Mr. and Mrs. L. D. Bliss and son, Hobart, of Morrisville, Miss Pearl Hall, Miss Woster and Mr. Cross of Burlington. The old neighbors will remember Pearl, as her father carried on the Russ Page farm 13 years ago. Miss Della Whitcomb and friend, Mr. Cantell, of Cambridge and Mr. and Mrs. Fred Ransom of the village were also callers.

At Trudeau's they entertained Mrs. Emerson and her sons, Orrin and Alvy and Miss Moody and Mrs. Eastman and daughter, all from the village.

Will Grimes and wife and Mr. Baker were the first of the week to Eden Pond and brought home a nice lot of fish.

Cars were out in great number and one thing I notice, there are a great many large cars and closed in more than usual. I counted ten very large cars. One stopped to buy milk and eggs. They are out for all summer. A young couple had a bed, camp, stove and tent, but they slept in the car. He had been a clerk in a bank and health gone, so came to find it among our hills and valleys.

Mrs. Ed Jones and Master Napoleon were Saturday visitors in Eden at Fred Jones'.

Mr. and Mrs. Lamay entertained our old neighbor, Mr. Giroux's young folks last week from St. Johnsbury.

Will Bessey and wife from Enosburg Falls were week-end visitors at Uncle Joel Bessey's.

Mr. and Mrs. Decell entertained Sunday Roy Bessey and wife and Mrs. Mitchell of Hyde Park, Mr. and Mrs. Fred Stowell of Johnson and Miss Bertha Page of the north village.
